

SEE WHAT THE EXPERTS IN THE INDUSTRY  
SAY ABOUT  
NICHOLSON PADDOCK CLEANERS...

"SWETTENHAM STUD AIMS FOR THE HIGHEST POSSIBLE STANDARDS IN QUALITY AND CLEANLINESS. THE PC1800 NICHOLSON PADDOCK CLEANER HELPS US ACHIEVE THAT STANDARD."

- Alan Morton (Stud Manager), Swettenham Stud

"WE HAVE BEEN EXTREMELY IMPRESSED WITH THE EFFICIENCY OF OUR NICHOLSON PADDOCK CLEANER. THE HEALTH AND WELLBEING OF OUR HORSES AND THE CLEANLINESS OF OUR PASTURES HERE AT LINDSAY PARK STUD ARE PARAMOUNT TO US. THE NICHOLSON PADDOCK CLEANER IS A MUST FOR EVERY STUD. A TRULY BRILLIANT MACHINE."

- Sam Hayes (Managing Director), Lindsay Park Stud

"THE NICHOLSON PADDOCK CLEANER PC900 HAS PROVED TO BE VERY SUCCESSFUL AT WERRIBEE ZOO. THIS MACHINE IS CAPABLE OF COLLECTING FAECAL MATTER FROM SOUTHERN WHITE RHINOCEROS TO THE SMALLEST OF AFRICAN ANTELOPES. REGULAR COLLECTION IN OUR LARGE OPEN RANGE EXHIBITS HAS RESULTED IN ENHANCED ANIMAL HEALTH OF OUR HOOFSTOCK COLLECTION, INCREASED PASTURE GROWTH AND MOST IMPORTANTLY A PRISTINE VISITOR EXPERIENCE FOR ALL TO ENJOY."

- Davin Kroeger (Animal Husbandry Supervisor), Werribee Zoo

"THE ABILITY OF THE NICHOLSON PC1800 TO TACKLE HEAVY MANURE BURDEN IS IMPRESSIVE. IT ALSO HAS THE CAPACITY TO EFFECTIVELY REMOVE OTHER SURFACE DEBRIS, INCLUDING SMALL ROCKS, WHILE CONDITIONING PASTURE."

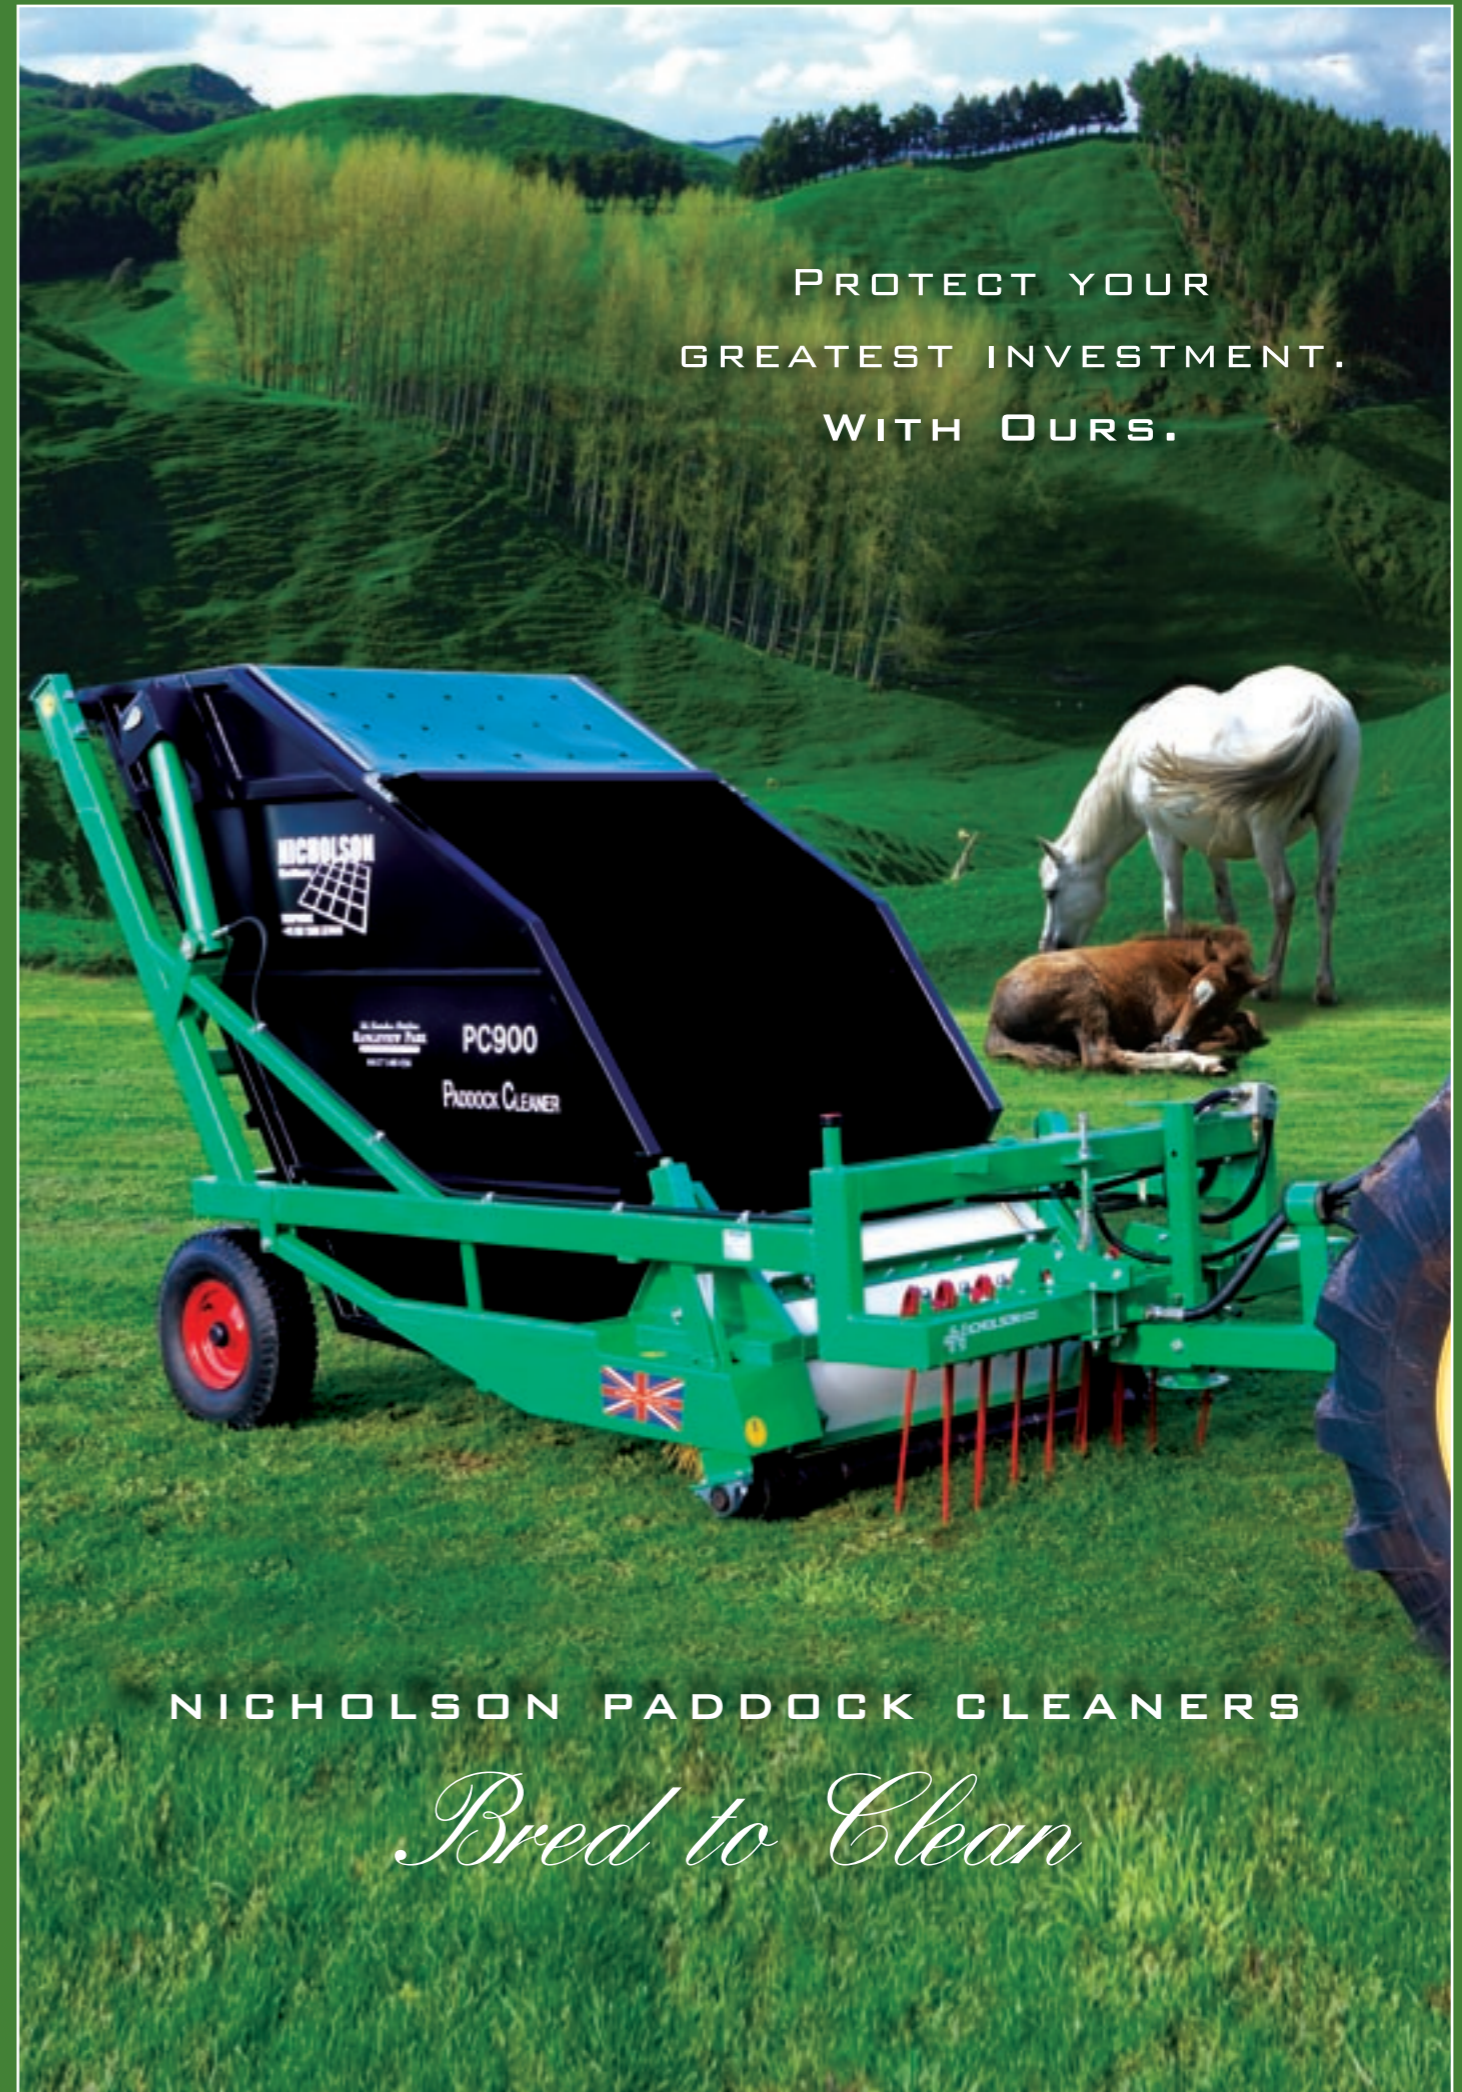

- Andrew Coulthard (Operations Manager), Faculty of Earth Sciences – Northern Melbourne Institute of TAFE

For an onsite demonstration and to find out how you can clean your pastures super efficiently, contact Wayne Smith on 0417 148 436 or email [sales@bredtoclean.com.au](mailto:sales@bredtoclean.com.au)

NICHOLSON PADDOCK CLEANERS

*Bred to Clean*

It's the paddock cleaner that has graced some of the finest properties in the world – the machine of choice for those who are serious about improving pastures and equine health.

There are two keys to the UK bred range of Nicholson paddock cleaners – super efficient operation and incredibly robust construction. Sitting neatly behind a small to medium-sized tractor the equipment employs a unique sweeping action, lifting waste from the turf and moving it cleanly to the hopper for disposal. The result is improved pasture and ultimately equine health. Nicholson paddock cleaners come in two sizes – the PC900 and PC1800. The smaller model is ideal for properties of five plus acres, but is just as suitable for larger properties and is super efficient with a towing speed of up to 10kmh.

The PC1800 is more suitable for larger scale operations and (depending on the topography of the land) will operate efficiently behind a 35–45hp tractor. Both cleaners have a tipping height of 1.7m and offer a wide sweep width.

You have invested significantly in developing a facility that is built around quality and efficiency. The only paddock cleaner that matches the benchmark that you have set is from Nicholson – makers of cleaners that ensure you have the most beautiful acres on earth.

Nicholson paddock cleaners patented design need only a low power requirement and therefore are very fuel-efficient to operate. The design of the unit makes them operable in all conditions and with the range of two sizes, you have the capability to clean even the largest area.

Operation is easy with simple fitting to virtually any tractor and the efficient design also allows the units to work at a very low noise level.

All Nicholson paddock cleaners use the same brush type and a variable, but extremely accurate, depth control using a horizontal ground driven roller mounted in front of the brush. This ensures droppings, bits of wood, stones, pine cones, etc. are contained between the brush and roller and deposited cleanly into the hopper.

## PC900

The PC900 uses the unique patented Nicholson design for efficiency and finish, and is suitable for tractors from 17hp upwards. It is connected with the lift arms and is lowered when approaching droppings and debris. A PTO pump drives the brush which keeps rotating, ensuring a smooth, non-stop operation.

### PC900

Type	Trailed
Drive	PTO pump
Suitability/performance	Up to 10kph
Tractor	17hp upwards
Tipping Height	1.7m
Overall Length	3.7m
Overall Height	1.85m
Overall Width	1.48m
Hopper Size	1.9 cubic mtrs

Capable of cleaning grass lengths up to 10cm without rakes, and 20cm with rakes, the PC900 is ideal for concentrated application in the spring to remove winter build-up of dead grass, which ensures better light and growth. This same coverage is useful in the autumn as it assists drainage over winter. This intensive cleaning has a light – ‘scarifying effect’.

## PC1800

A larger machine, the PC1800 is suitable for properties of 50 plus acres and yet can still easily be pulled behind tractors of 35 hp upwards, depending on the conditions. The wider sweep on this model enables large tracts of land to be covered efficiently.

### PC1800

Type	Trailed
Drive	PTO pump
Suitability/performance	Up to 3ha/hr
Tractor	35 hp upwards
Tipping Height	1.7m
Overall Length	4.47m
Overall Height	1.8m
Overall Width	2.3m
Hopper Size	4.4 cubic mtrs

PC1800, like the 900 is hydraulically driven via a PTO pump, using one spool of the tractor. It has a tipping height also of 1.7 metres and is capable of cleaning up to 3 hectares per hour, depending on ground conditions.
